# About DSAPPS INC

- California corporation focusing for over 20 years on products and IT implementations in the areas of enterprise project management, business process automation, business intelligence, big data and cutting edge data security technologies.
- Originally established in 1994 as ProjectWare our customers include Government as well as large and small business enterprises. We installed our first enterprise project management groupware solution in 1995 at the California Department of Veteran Affairs followed with automating projects and project integration at the City of Oakland. Our Fortune 100 customers have included companies like Cisco, Genentech, HP etc where we implemented numerous business process automation solutions. We also support and work with a number of smaller high tech start-ups in Silicon Valley.
- In 2009 DSAPPS was member of the HP team awarded the Edelman award for break-through in operations research resulting in over \$500 Million savings
- Our products include
  - ProjectWare Dashboard a cloud based software tool for collaborative knowledge management allows teams to rapidly automate business processes within and beyond the enterprise.
  - TOP10DATA IOT security solution using a flag and solve security remediation process
  - DSAPPS data security cloud security platform using a highly secure data fragmentation approach to secure data and apps.
- We partner with IBM, Microsoft, Oracle, SAP, Salesforce, Amazon and Nvidia integrating our solution to their products.

### AUTOMATE SOLUTIONS

Simplify and speed-up complex solution implementations using ProjectWare templates.

### AUTOMATE DATA SECURITY

dsapps will help you implement customized data security policies, government regulations, guidelines

1. Customize data security project templates for specific regulations, guidelines, policies you require.
2. Set up cloud and mobile based platform for team collaboration across your organization and partners.
3. Integrate sensitive documents, files and databases with access logs and abnormality access alerts.
4. Set up access rules and customize automated alerting scripts.
5. Link abnormality access events with automated team collaborative projects launched to investigate abnormal access, permit exceptions or break access rules.

Track and update team action status

### Manage Customer Contracts Super-securely in the Palm of Your Hand

ProjectWare's Customer Contracts Dashboard secured with dsapps super-secure cloud storage allows collaboration with customers, sales and support teams - enhancing customer experience and automating project workflows.
